NATURAL MAGNESIUM

FOR SALT & MINERAL POOLS

Turn your pool into a relaxing wellness retreat with Pool Pro Natural Magnesium. Feel and see the difference with our superior quality natural Magnesium Chloride. Magnesium is known for its many benefits which may include:

- ❖ Moisturises and softens your skin and hair
- ❖ Gentle and safe for bathers with sensitive skin
- ❖ Soothes and relaxes your body and muscles
- ❖ Helps to create crystal clear, silky soft water

For optimal results, Pool Pro recommends using Pool Pro Natural Magnesium with a complete Neptune/Pool Pro system (pump, filter and chlorinator), operating at an optimal TDS of 3,000-3,500ppm. This product can also be used with other branded systems. Please check the TDS requirements of your individual system.

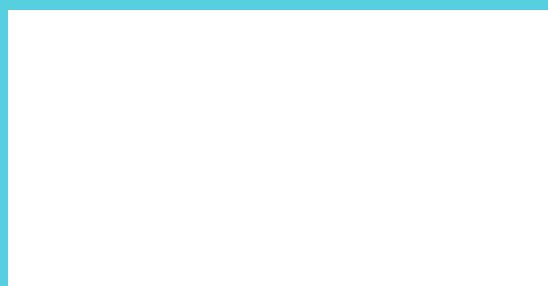

General Directions: Add 5kg of Natural Magnesium and 8kg of pool salt per 10,000L of pool water to raise the TDS by approximately 1,000ppm.
Example: For a 50,000L pool add 25kg of Natural Magnesium and 40kg of pool salt to raise the TDS by approximately 1,000ppm.

For maintenance dose, add 10-20kg of Pool Pro Natural Magnesium every 3 months. All dosage rates are a guide only.

For more information scan the QR code on this flyer or visit www.swimmingpoolsalt.com.
